

Doncaster CCG
Community Eye Service

Inclusion Criteria

Within the Community Service, the following symptoms/conditions can be assessed, treated and often managed (under 16's have to be accompanied by an adult):

- Mild visual loss
- Sudden onset of blurred vision
- Low risk systemic disease affecting the eye
- Trichiasis (in-growing eyelashes)
- Non-malignant or low risk lumps and bumps in the vicinity of the eye (for differential diagnosis)
- Low risk retinal lesions
- Patient reported field defects (non-specific field defects)
- Differential diagnosis of red eye
- Dry / Itchy / Gritty eye
- Mild pain or discomfort in the eye
- Flashes and floaters
- Foreign body and emergency contact lens removal
- Epiphora (watery eye)
- Sticky discharge from the eye

The Community Service also provides the following pathways:

- Glaucoma/OHT Monitoring
- Children's Post Vision Screening Service
- Cataract Pre-Operative Assessment
- Cataract Post-Operative Assessment
- IOP Referral Refinement
